2018 COURTWISE CASE FILINGS

Note: The Criminal/Traffic category includes associate and circuit felony and misdemeanor filings as well as traffic cases and municipal appeals.

COURT PERFORMANCE MEASURES

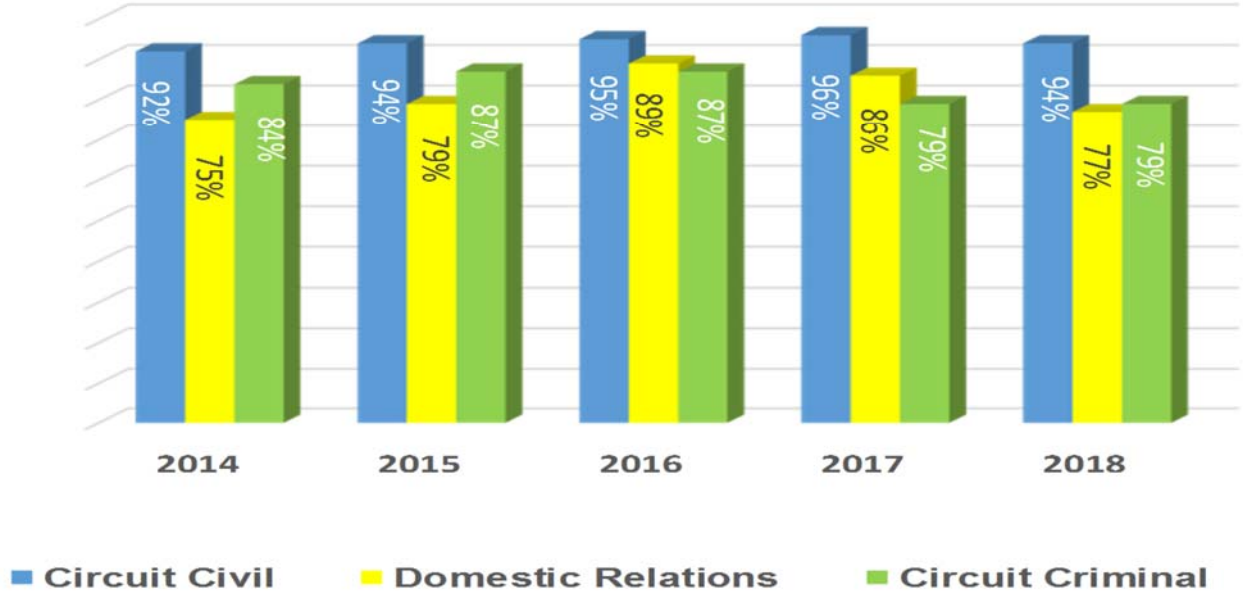

CLEARANCE RATES are the ratio of dispositions to filings in a given time period. Here a calendar year is used for the rates shown.

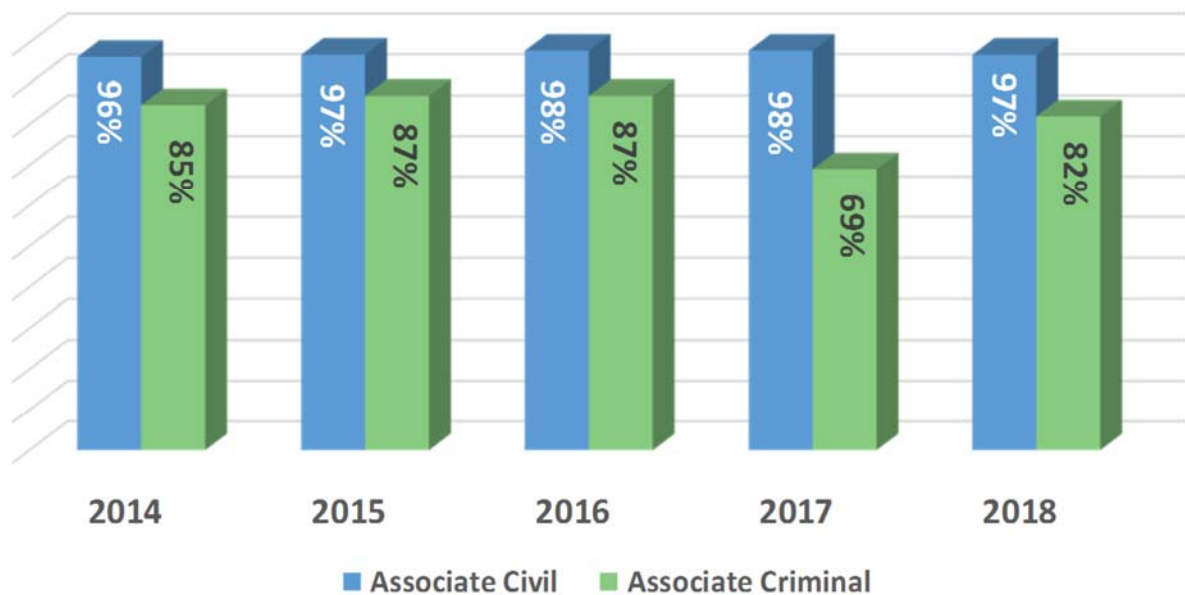

Time standards establish the period in which 95% of filings should be disposed. For dispositions, the standards incorporate 900 days for Circuit Civil cases, 420 days for both Circuit Criminal and Domestic cases, 360 days for Associate Circuit Civil cases and 240 days for Associate Criminal cases.

AGE OF PENDING CASELOADS use the same time standards as time to disposition. The standards require that 95% of pending caseloads are within these time periods. The statistics shown are for caseloads on December 31.

CIVIL RECORDS DEPARTMENT

In 2018, there was a concerted effort to increase the efficiency of the Department without sacrificing accuracy. In furtherance of this goal, the following major activities were undertaken.

- ➡ Staff was cross-trained, and employee skills were redistributed where necessary.
- ➡ Efforts were undertaken to improve employee engagement in the Department and in the Court.
- ➡ Interdepartmental training was developed to further understanding of how work of each department impacts other areas of the Court, other Court employees, and Court processes.
- ➡ Strategic planning was conducted to make case management processes more efficient.
- ➡ Front counter staff were trained to improve customer service.

CRIMINAL RECORDS DEPARTMENT

In March, the court began processing municipal ordinance tickets issued by Lake Tapawingo and will implement Lake Lotawana in 2019.

In April 2018, the Independence Criminal Records office was also able to implement electronic filing of ordinance and traffic cases through the Prosecuting Attorney's portal. Previously, the paper tickets were delivered and scanned into JIS. (Criminal cases continue to be electronically filed through the Prosecutor's Karpel system.)

For several months throughout 2018, with the assistance of Judge Long and the Prosecutor's Office, approximately 2,000 old outstanding traffic tickets were disposed.

In October 2018, the department began electronically processing arrest warrants requested after office hours. Using folders shared with the divisions, anytime warrants are now also electronically processed.

Also, in October 2018, the department became a pilot for the State, using Show-Me-Courts as the case management system for traffic and municipal ordinance cases. This has involved working closely with OSCA, requesting system enhancements where needed to fully process caseloads. Currently only half the staff is working in Show-Me-Courts, because many processes needed for these cases are still only available in JIS. As a result, two separate case management systems are currently in use for traffic and municipal cases.

PROBATE RECORDS

2018 was a productive year in the Probate Records Department. Due to improved processes, adjustments in work allocation, and the diligent efforts made by Department staff, efficient turnaround time in case processing was achieved and maintained. New cases are now often processed within a couple days of filing, sometimes on the day of filing. Other case processing activities, such as notices of annual filings due and the auditing of those filings, were achieved in a more effective and efficient manner.

On August 28, 2018, significant changes to Chapter 475 went into effect. One of these changes requires background checks and credit reports for individuals seeking appointment as guardian and/or conservator. These checks and reports are also required of those previously appointed and currently serving as guardian/conservator. Notices of the new requirements were sent out to all acting guardians and conservators. Some of the legislative changes in Chapter 475 required updates to internal forms and procedures. A collaborative effort was made by Division and Department members to capture and implement these mandated changes.

Civil Process

With regard to service rates on pre-judgment process, Civil Process attempts to establish service at the addresses provided by plaintiffs and their attorneys. If an address is determined to be “bad”, there is an effort to find a “good” address. This effort may be through calling the plaintiff, plaintiff’s attorney or checking with neighbors. Bad addresses prevent proper service and account for 18% (3,850 papers) of the overall pre-judgment papers received. It is also the only variable for establishing service that is out of the control of Civil Process. Excluding bad addresses, the pre-judgment service rate for 2018 would be 72%.

With reference to post-judgment papers, the most time consuming tasks performed by Execution Deputies are evictions and replevins. In an effort to assist the Execution Deputies in their time management, a plan has been developed to have a clerk contact landlords and schedule evictions. The goals are better customer service and improvements in the safety and efficiency of our Execution Deputies. This plan was implemented in February 2018.

JURY

2018 was the third full year in which the new jury room in the Eastern Jackson County Courthouse (EJCCH) in Independence was in use. The EJCCH jury room accommodates 220 jurors, about twice the number of the old jury room. The Kansas City jury room has seating capacity for 250 jurors.

The ability to bring in a larger number of jurors to Independence serves a dual purpose. It allows the Court to better meet the demand for jurors from the 5 jury trial divisions that sit in Independence. It also allows additional jurors to be brought into EJCCH and utilized for trials scheduled by the 10 jury trial divisions that sit in Kansas City, when the demand for jurors by those divisions exceeds the supply. While it is more common for demand to exceed supply in Kansas City, this process can actually be used for either location. Having larger jury facilities in both locations provides the Court with the flexibility to summon jurors to either location when other factors impact the Court's ability to use one of its jury facilities as was the case in February, 2019, with the flooding of the Kansas City Courthouse.

Another factor impacting the Court's flexibility with respect to the management of its jurors was the implementation of a new jury management software system in 2018. When this web-based application was implemented in February 2018, the Court was the second one in the State to begin using Show Me Jury (SMJ).

While the Court still issues paper summons to prospective jurors, jurors now go on-line to complete their qualification and informational questionnaires. Jurors can also choose to receive electronic notices regarding their jury service.

The innovations provided by SMJ permit the jury supervisor and her staff to oversee and manage the size of the pools that the Court brings in on a given day as needs change. A secondary benefit is better customer service to jurors. However, it does mean that the Court's "yield" numbers are not as high as they previously were. While cancelling jurors when not needed is a good jury management practice, saving resources for both the Court and jurors, it does lower the calculated yield of issued summons.

The number of jurors sent to divisions increased 6%.

Juror yield from those summoned declined 8%.

The percentage of available jurors sent for jury selection increased 9%, and, percentage selected as jurors increased 2%.

Comparison 2018 to 2014:

The number of jury trials decreased 4%.

Available jurors increased 11%*.

The number of jurors sent to divisions increased 7%*.

Juror yield declined 2%.

The percentage of available jurors sent for jury selection and the percentage selected as jurors, each declined 2%.

***These increases were in the Independence location, and were due in large part to the new larger jury room opened in the Independence location, which is discussed in the preface.**

Of the juries sworn in civil cases in 2018, 17% were for vehicular personal injury cases, 15% were for negligence, and 13% were for employment discrimination.

In criminal cases, 32% of the juries sworn were for homicides, 6% were for assault cases, and 6% for rape cases.
