

Hilltop Residential Facility

Health Services

Hilltop has a fulltime nurse who is available to provide assessment of youth's health needs. This involves physical screenings as well as follow up on dental and vision care. We also have a pediatrician from Children's Mercy Hospital available once a week for medical services. Youth determined to be in need of services can be transported to the emergency room and/or urgent care centers as deemed necessary. All youth receive Medicaid if all provisions have been completed. **We are obligated to follow the doctor's recommendations for the youth's care.**
